

# DOCK CUBICLE

## Free Standing Steel Base Unit

MEMBER OF  
SOUTHERN AFRICAN REFRIGERATED  
DISTRIBUTION ASSOCIATION

The **D.D.L. External Dock Cubicle**, is keeping with world wide trends of keeping all docking equipment outside the warehouse building. An independent free standing unit forming a lock between the building and truck/trailers while loading or unloading, yet affording total control over security, temperature, environmental conditions and access etc.

The **Dock Cubicle** is ideally suited as an add-on, for existing completed buildings.

**MODEL  
36/750**

**MODEL  
33/650**

OH	- Overall Height	mm	mm
OW	- Overall Width	mm	mm
IW	- Internal Width	mm	mm
